Pattern, rhythm, movement

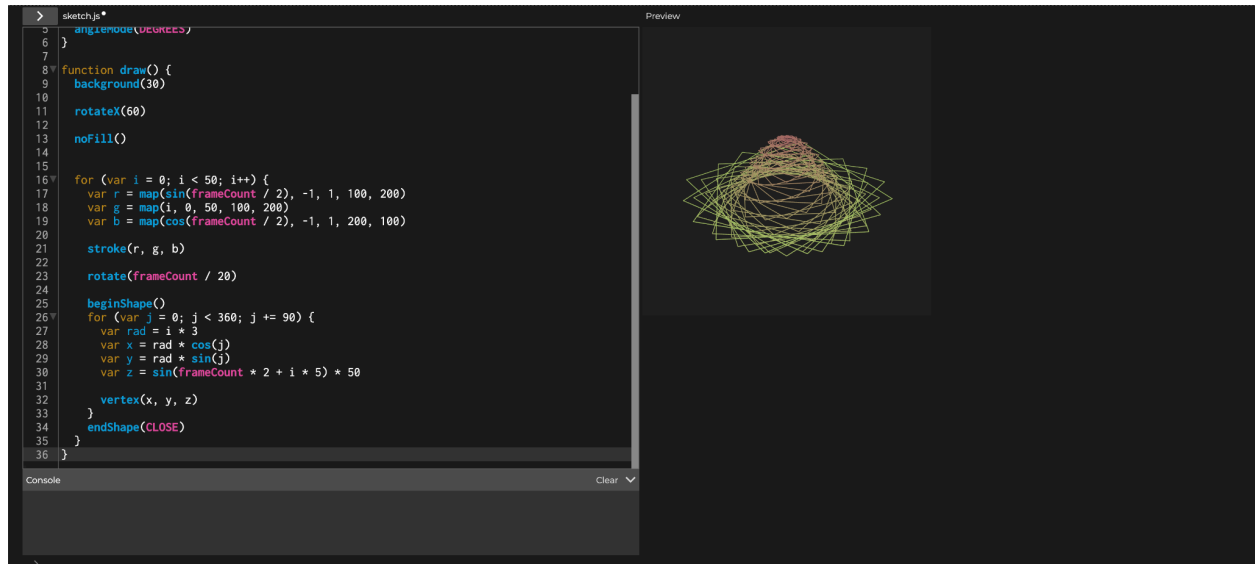

I started with a blank canvas as I was still unsure of which direction I wanted to go for this project. I then ended up re-watching the YouTube recording and also other YouTube videos to gain some inspiration.

I then ran into errors with using webGL within p5.js so I did some troubleshooting and found a workaround. The workaround allowed me to bypass and use webGL, which allowed me to get the pattern animation I wanted. I referenced the p5.js sketch below.

p5.js sketch:

```

function setup() {
  createCanvas(400, 400, WEBGL);
  angleMode(DEGREES);
}

```

```

function draw() {
  background(30)

```

```

  rotateX(60)

```

```

  noFill()

```

```

  for (var i = 0; i < 50; i++) {
    var r = map(sin(frameCount / 2), -1, 1, 100, 200)
    var g = map(i, 0, 50, 100, 200)
    var b = map(cos(frameCount / 2), -1, 1, 200, 100)

```

```

    stroke(r, g, b)

```

```

    rotate(frameCount / 20)

```

```

    beginShape()
    for (var j = 0; j < 360; j += 90) {
      var rad = i * 3
      var x = rad * cos(j)
      var y = rad * sin(j)
      var z = sin(frameCount * 2 + i * 5) * 50

```

```

      vertex(x, y, z)
    }
  }

```

```
    endShape(CLOSE)  
  }  
}
```
